Oct 2019 – Sep 2023

Experience

92 Devs, FrontEnd Developer

Developed and maintained responsive, user-centric web applications using React.js, implementing best practices for performance, scalability, and reusability.

Built modular and reusable React components, significantly improving development efficiency and code maintainability across projects.

Implemented RESTful API integrations to fetch, display, and update dynamic data in real time, ensuring responsive and data-driven interfaces.

Integrated and displayed JSON data efficiently in UI elements such as interactive tables and cards, enhancing the user experience.

Collaborated on the deployment and optimization of web applications, focusing on clean architecture, performance tuning, and responsive design.

Rawalpindi, Islamabad,
March 2023 - Present

Alright Tech (PVT), FrontEnd Developer

At my previous company, I had the opportunity to work on a variety of challenging projects that sharpen my skills in HTML, CSS, Bootstrap, and JavaScript. I also work with the Laravel team and learn a lot of things in Laravel but on a basic level like folder structure where we attach databases etc. My work involved building responsive, user-friendly web interfaces, optimizing front-end performance, and collaborating with cross-functional teams to deliver seamless user experiences.

Developed more than 30 responsive websites for different Companies in custom with HTML | BOOTSTRAP | CSS | JAVASCRIPT in Laravel
